COOLING TOWER FLOATING BALL COVER BENEFITS/SIZING

- Controls Algae by Blocking Sunlight
- Saves Energy
 - sump water is cooler in warm weather
 - sump heaters run less in cold weather
- Safe for Water and Food Contact
 - HDPE plastic even meets FDA guidelines for food contact
- Prevents Waterfowl/Bird Fatalities
- Balls Rise and Lower with Water Level
- UV Inhibitor Gives 10+ Year Service Life
- Maintenance Free - Easy Installation
- Made in USA - 100% Recyclable

Sizing: Approximately 10 balls are needed per square foot of water surface:

Examples:

5' x 10' sump = 50 square feet x 10 balls per square foot = 500 balls

10' x 10' sump = 100 square feet x 10 balls per square foot = 1,000 balls

(Note: Sizing so there are a few extra balls is fine. The extra balls will simply start a second layer with added benefits.)
